

## The Men's and Boys' Store

### Farmers and Harvesters

We carry a full line of harvest supplies. Overalls, Smocks, Shoes, Sox, Underwear, Blankets, Shirts, Sweaters, Gloves, etc.

When in need of a suit of clothes or winter overcoat, give us a call, we will be pleased to show you. We are agent for two clothing houses and will take your measure for a suit of clothes or overcoat.

We carry the famous Carr's Mackinaw Coats and Blankets. Our goods are selected from the best manufacturers of Canada and prices are right, none better.

**C. J. BRAREN**

## SMOOTH IN OPERATION

TAKE the wheel of the new Oldsmobile Six and run up the entire speed range. Whether at five or fifty-five miles an hour, you will find it unbelievably smooth. Under the hood of the Oldsmobile Six is a power plant precision-built. Simplicity, compactness and accessibility have been sought and attained. In workmanship and materials there is a quality found usually only in much higher priced cars. Delicate testing equipment assures the precise balance of the crank-shaft, in every position, running and standing. In addition, the patented Harmonic Balancer minimizes every trace of periodic vibration. The Harmonic Balancer is absolutely automatic in action, requiring no attention or adjustment. Combined with the precision workmanship throughout the car, it affords an unrivaled smoothness of performance that will be a revelation, even to the drivers of larger and more expensive cars.

Only at the wheel can you experience and appreciate the smooth, effortless performance of the Oldsmobile Six.

Cecil B. DeMille presents

### "Three Faces East"

with Jetta Goudal, Robert Ames, Henry B. Walthall and Clive Brock

ALSO A GOOD TWO REEL COMEDY

### CLARESHOLM LOCAL NEWS

Born, on August 23, to Mr. and Mrs. E. Schumacher, a son.

Born, on August 29, to Mr. and Mrs. Dave Schumacher, a daughter.

W. Moffatt, who is in the Hotel Cross-hospital, Calgary, is reported of progressing favorably.

Mrs. Abel is here from Winnipeg for a visit with her parents, Mr. and Mrs. W. Knight.

In a very one-sided baseball game here last Sunday, Staveland defeated Clareholm 12 to 1.

Olaf Finstad came up from Minneapolis last week, and will remain during the threshing season.

C. Mogensen is putting in a coal yard next to the Imperial Oil establishment on Railway street.

Oscar Haig and family have returned from Macleod where they have been living for several months past.

Wet weather has held up harvesting entirely this week. Several inches of rain has fallen since Sunday evening.

So far as cut wheat in this district is of the bumper crop variety. If frost continues to hold off late grain will also give a big yield.

G. R. Brewster, veterinary surgeon, has again taken up his profession at Clareholm. For the present he will be at the Wilton Hotel.

Misses Agnes Tremblay, Kitty Gay and Anna Paulsen left Wednesday morning for Calgary where they will attend St. Hilary's College.

G. G. Coote and John Herron were officially nominated at Macleod on Tuesday, in the Dominion election contest. No other candidates were placed in nomination for this constituency.

A meeting in the interests of John Herron will be held in the L.O.O.F. Hall on Wednesday evening, Sept. 8, at 8:30 o'clock. H. P. O. Savory and Dr. G. D. Stanley will be the speakers.

"Three Faces East," with Jetta Goudal, Robert Ames, Henry B. Walthall and Clive Brock, at the Rex Theater Friday and Saturday nights this week. Adapted from the play by Anthony Paul Kelly.

### Provincial Election Notice

Statement of election expenses by or on behalf of Gordon B. Walker, U. F. A. candidate for the Electoral Division of Clareholm, election of June 28, 1926.

Personal expenses	\$30.55
Phones	10.45
Printing	29.50
Hall rent	\$5.00
Total	\$116.50

R. A. Macleod,  
Official Agent

### Card of Thanks

Mr. and Mrs. A. L. Olmstead wish to thank the ladies of the Star Line and the ladies of Clareholm for the beautiful flowers sent to Mrs. Olmstead since she has been in the hospital.

### Canadian Pacific Crop Report

The Canadian Pacific Railway's crop report for Alberta under date of August 30 says:

With few exceptions weather in Alberta the past week has been of the best and harvesting has made good progress. In the north as a whole from fifty to sixty per cent of cutting is completed. Rate earlier in the month helped wheat to fill and added considerably to the yield besides benefiting oats and barley. If weather conditions continue favorable indications are for better than an average yield. A small amount of threshing has been done showing good yields and grade.

Along the E. D. & B. C. Railway harvesting is quite well advanced. About fifty to seventy per cent of wheat and twenty-five to thirty-five per cent of other grains cut. A crop is the largest in the history of this section. A large amount of new land has been broken for next year's crop.

### Card of Thanks

Mr. A. McKinney and Mrs. George McKinney and family wish to express their heartfelt thanks to their friends for their aid and sympathy in their recent bereavement, also for the many beautiful floral tributes.

### BUSINESS LOCALS

A few good 50 lb cans for sale. Clareholm Bakery.

Automobile for Sale—Six cylinder sedan, in first class condition. Inquire of O. L. Reinecke, Clareholm.

Lost—Tire chain, new, Weed, lost between Clareholm and Parkland. Finder please leave at Review-Advertiser office.

Wanted—To sell at low price, 340 acres good farm land along Pincher Creek, or will trade for property in Clareholm. Plenty good water, trees, buildings, along auto trail; one mile post office and town.—C. R. Laing.

A demonstration in millinery will be held under the auspices of the Clareholm U. F. W. A. on September 15-20. Anyone wishing to join the class, would they kindly let Mrs. E. W. Fenton or Mrs. Salmon know as soon as possible.—Secretary.

### APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that Fred Collier and Thos. Moore of Clareholm, have made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance, viz: the road allowance lying south of section 4-13-28-W4.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.

Dated at Clareholm this 6th day of August, 1926.

Fred Collier & Thos. Moore,  
Applicants.

## The Vast And Varied Agricultural Possibilities Offered To The Settler In Canada

Canadian settlers are drawn from nearly every corner of the world, and so vast and varied are the agricultural possibilities in Canada with respect to soils and climate, that every settler should have little trouble in finding employment best suited to his particular taste or education.

The accompanying map will give some idea of the extent and distribution of Canada's fruit, ranching, dairying, wheat and mixed farming lands as they are to be found today.

The gardener can grow apples, peaches, pears and small fruit in the Niagara district of Ontario, or apples and small fruit in the Annapolis basin of Nova Scotia, and a variety of fruits in the Okanagan, Kootenay or New

Western Canada. Fully captured the fertility of the last section, when the desirous respecting its climate and fertility were definitely away, population and railways advanced more rapidly than they had ever before invaded a new country. In the period 1891-1921 the territory embraced by the present provinces of Alberta and Saskatchewan increased eightfold in population, and the occupied farm lands spread over some 35,000,000 acres.

But it is not to fruit, ranching, dairying or even wheat farming that the settler and farmer are now turning their attention, but to mixed farming. This is becoming more and more noticeable as the years go by and the country

### Modern Ideas In Old Book

Early Work on Kindness to Animals Being Reprinted  
A treatise entitled, "The Rights of Animals," prepared by Herman Dugent in 1791 as a thesis in taking the master's degree at Providence College, now Brown University, has just been reprinted by the American Society for the Prevention of Cruelty to Animals.

It was printed at Sag Harbor, Long Island, in 1792, and is said to be the first American work on humanitarianism ever published. Copies are so rare that it has remained unknown except to a few collectors. An ethical treatise, the work is considered of such excellence that it has been reprinted for free distribution, according to the introduction by R. W. P. Bisset. In the hope that the sympathies aroused by it may not be lost to the reader's "pet and male," but may awaken humane efforts in another cause, the abolition of the steel trap.

### Who's Who In Wheat

J. C. Mitchell, of Dalhousie, Saskatchewan, Will Try Again For Premier  
Mention in Wheat  
Based on a press report stating that J. C. Mitchell, of Dalhousie, Saskatchewan, was invited to try to win back the wheat crown at the International show at Chicago, the New York Sun recently published the following editorial on the heading, "Who's Who in Wheat."

Mentana supplied to the world its champion wheat grower last year. It was J. P. Yates, of Fitchburg in that state captured the title at the International show in Chicago, Hay and Stock Show in the autumn in Chicago, but Canada does not intend to let the honor stay south of the international boundary if its farmers can drag it north.

The Dominion now announces that J. C. Mitchell, of Dalhousie, Saskatchewan, who has already been cock of the walk three times, will be a contestant this fall.

Mr. Mitchell was not in the contest in 1925, but will be on the show of Lake Michigan this year.

This International competition was instituted fifteen years ago, and Canada has taken the blue ribbon three times. Seager Wheeler of Northern Saskatchewan, succeeded in finding top place five times. Nobody else has won more than twice.

Canada's hope this year has a typical pioneer's history. He came to America in 1866 from Manchester, England. He did not have any capital. He took up a quarter-section of land from the railway and went to work. Now he farms 300 acres and is asking the Canadian department of agriculture to register a new potato he has developed which appears to be to all a good can aspire to be. Today a railroad crosses the other side of the farm and the highest it is a show place.

Mr. Mitchell has spent more than five times telling other persons that there is no such thing as a free lunch. He went out and made his chance. And he did not make it by leaving during the wheat seasons either.

## Dominion Land System Of Survey Has Proven To Be The Most Desirable In Every Way

### The Cultivation Of Corn

Nowadays one hears of community gardens and the advantages of grouping settlers in such a way that they will get the most out of the amenities of modern civilization. But the Dominion land system of surveying the farms radiate from a central community has always brought forth objections on account of the difficulty of working land laid out in irregular shape or any other form departing from the square or rectangle. Even the rectangular is sometimes considered objectionable if the length greatly exceeds the breadth as the distance the farmer would have to travel to get to his work at the year end of the farm would then be too great.

To trace the rectangular farm to its beginnings one has to go back to the days of the ancient Romans. It is recorded that the system of division of lands by meridians and parallels was laid out by the Romans by the engineers, the first people who really practiced agriculture in Italy. The division of land by these lines and a religious and mythical foundation. The unit of square measure was the "jugum," which was approximately five-eighths of the Roman acre. In subdividing the lands of a colony, squares of 2,000 "jugera" were often used. Each of these squares was 1,000 feet square, or a little more than three-quarters of the size of the quarter-section farm unit of Western Canada. The first survey was made by the individual holders, which ranged from two to ten jugera or larger.

The system of survey based on meridians and parallels, with sections one mile square, and six-mile squares, was first used in America in 1785 by act of the congress of the United States, providing for surveys of the public lands. The first survey was in Ohio, where a principal meridian was established and at right angles to it townships were laid out. The survey was extended, principal meridians and base lines were laid out in early years until at present there are over 20 meridians and almost as many base lines.

There has been a great deal of speculation as to who introduced this system of subdivision of land into America. One theory is that it was Colonel Bouquet, who in 1764 was sent by General Gage to report on a system of subdividing land for settlement in the Ohio country. Colonel Bouquet was the first to actually apply the system. In 1785 he was designated to stake out public lands in the state of Ohio. If Colonel Bouquet originated the rectangular system of land surveying, it may be said that the idea came directly from Italy, for although he was in Italy, he was not in Italy when he was the King of Saxony in Italy before coming to this country.

No doubt one of the fundamental reasons for the adoption of the rectangular system in America was on account of the simplicity it offered in the development of a new country. Where townships were laid out from meridians and base lines a definite geographic position is ascribed to each township which is surveyed today or in the future. The townships fit together with a few fractional parts in the boundary district.

Intensive Cultivation Seems Necessary To Assure Success  
The following bulletin was prepared by Mr. T. M. Moore, head of the specialist of the Dominion experimental farm, Indian Head, at the request of the Saskatchewan Corn growers' Association, with a view to especially assisting the beginner in order that he may secure the best possible results in raising his corn crop.

The corn is doing well. We must keep it that way. This depends upon the grower. The grain crop is now depending on the weather. The corn crop demands cultivation.

Some of the common reasons for disappointing crops are for:  
Droopy weeds;  
Conserve moisture;  
Mix the soil constituents;  
Improve the physical condition of the soil;  
Eliminate dormant weed seeds;  
Give the plants a loose soil in which the roots will grow better;  
Control soil temperature;  
The type of cultivator to be used will depend on the type available, but it must do the job well. The first cut of the corn is done after the plants have emerged should be deep and fairly close to the plants. Subsequent cultivations should be shallower and not close to the plants. Four or five inches deep for the first cultivation and two to three for the others in a fair gauge. At least six cultivations are required. The less ridged the cultivation is the better. If you have a variety which matures early, you will be anxious to secure seed. In this case thin the number of plants per hill to three, or if the row is thin the plants to one apart when young. A small area treated in this way will bring striking results. If you are feeling better, secure a thick stand in better seed.

Cultivate your corn crop as often as you can before it gets too high to work in. Remember the first and biggest object in cultivating corn is to kill weeds.

### Record Gold Output

Gold and Platinum Produced in 1925 Increasing Quantities  
A record quantity of gold is being produced in Canada. Figures recently issued by the Canadian government bureau of statistics show that in 1925 the output was 1,735,735 fine ounces worth \$25,888,526. This was an increase of 210,653 fine ounces over the 1924 production.

In 1925 Canada produced a total of 6,698 fine ounces of platinum worth \$1,441,069. Of other metals in the output were 219,227 ounces; the Yukon produced 4,817 ounces; Manitoba, 1,421 ounces; Nova Scotia and Quebec, 1,600 ounces apiece.

Of the platinum, 5,622 ounces were derived from Canadian ore treated in British and United States refineries. Practically all of this came from copper-nickel ores in the Sudbury district.

### Many United Livestock Train

Total Attendance Through Saskatchewan Was Over Eight Thousand  
After a three weeks tour through Saskatchewan the livestock train headed out by the department of agriculture, under the direction of Mr. J. H. McLean, has returned to Regina. There was a total attendance at the various places visited by the train of over 8,000 visitors. Of the animals disposed of, the Shorthorn breed was most in demand, 25 Shorthorns being sold, together with four Polled Angus, two Red Polls, three Arabians, two Holsteins and one Hereford.

These sales completely cleared out the stock of pure-bred stock in the department of agriculture, with the exception of the Hereford bull which won the junior championship at Regina spring show and two Holsteins. Two scrub bulls were bought by the livestock men in exchange for purebred stock.

### Southern Alberta Sugar Beets

There are seven thousand sugar beets cradled to sugar beets in Southern Alberta this year, a thousand more than last year. Early prospects are for a good crop.

"How did you catch such an awful cold?"  
"I changed from horn-rimmed glasses to thick ones."

Where townships were laid out from meridians and base lines a definite geographic position is ascribed to each township which is surveyed today or in the future. The townships fit together with a few fractional parts in the boundary district.

### Cat Walks 65 Miles to Old Home

A 65-mile trek made little to Tommy, a pet cat owned by Mr. and Mrs. Robert P. Birke, who moved from Hamilton to Loveland, Colo., several weeks ago. A few days after the family moved the cat disappeared and the cat had returned to the former home and was being cared for by neighbors awaiting his master's arrival.

### Musical In Good Company

For Tom, famous British painter, is busy with a study of which the central figure is St. Paul. Tom's work is "The Last Supper," which was painted the present time, St. Paul, St. Theresa and Muscard.

### Map of Canada Showing Agricultural Possibilities

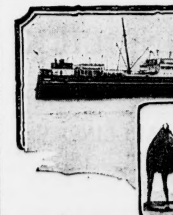

### Butter Awards At Regina

Inter-Provincial Blue Ribbon Competition At Regina Exhibition  
The blue ribbon trophy representing the inter-provincial blue ribbon in creamery butter awards at the Regina exhibition was won by the Grosvenor Creamery Company, of Brandon, Man. After this company had scored first place in the Manitoba section for the blue ribbon competition, the Dominion Creamery in second place.

For the Motherwell trophy the Manitoba creamery won in competition with Central Creamery, Calgary, and the first prize, and Edmonton Pure Butter Company, second prize in the Alberta section, and in the Saskatchewan section, the Lloydminster branch of the Saskatchewan Co-operative Creameries was first and the Regina branch of the same company, second.

### C.N.R. Official Made Indian Chief

W. J. A. Kingland, general manager of western lines, Canadian National railway, during the Saskatchewan exhibition was made chief of two Indian tribes. Chief Whiskey, son of the famous refugee from the United States at the time of the Custer massacre, and Chief Charles Eagle Crow of Saskatchewan, performed the ceremony.

### Derby Winners Struck for Canada

Twenty-five thoroughbreds coming from all parts of Great Britain, Ireland were unloaded from the Canadian Pacific liner Montserrat in Montreal recently for shipment to the Mullan breeding and training ranch near Winnipeg, where they went by last freight train. Several of them were finely bred animals, counting winners of the English Derby and Grand National in their stables.

Interviewed at the wharf, A. Mullan, owner and shipper of the horses, said they had been collected all over England. They had, he said, come through the voyage in first-class condition and after a few weeks' training and acclimating, would be ready in some cases to race. Mr. Mullan is keen in the thoroughbred racing in

Westminster districts of the sunset province of British Columbia. The development of commercial nut trees is a recent and successful development in Southern Ontario and British Columbia.

In the foothills of the world, and in the British Columbia valleys, and in Southern Saskatchewan these can be obtained some of the finest ranching districts to be found the world over. When His Royal Highness the Prince of Wales decided on ranching as the recreative hobby, it was in the Canadian western foothills that he made his choice.

The fully sheltered soil can feed its crops in the central parts of Nova Scotia, and in the grazing districts of Southern Saskatchewan, and Southern and Southwestern Alberta, as well as in the central highlands of British Columbia. Nearly every variety of sheep can be, and is being raised on the pastures in Saskatchewan and Alberta, from the Karakoram (Persian) sheep near Calgary through the Lincoln, Leicester, Cotswold, Shropshire, Oxford and Hampshire, to the finer breeds, Dorset, Southdown and Merino. A small number of South Devon, Shorthorn and other breeds also found throughout Canada, but such numbers are not increasing very noticeably.

The stronghold of the dairy farm has been Southern Ontario and Southern Quebec and, rightly so, as these districts are suited to intensive farming and are near large markets and also shipping points, where butter and cheese can be disposed of at remunerative prices. The prairie provinces are also making rapid strides in the production of butter, and the progress during the past few years has been nothing short of phenomenal. At a dairy show held in London, England, recently, an Edmonton dairy won the first prize in the salted butter class, and the second prize went to the Royal Lake (Manitoba) dairy. In the unsalted class a Regina creamery won the premier award.

The fruit and dairy farms have, however, been vastly eclipsed by the fame of the western wheat fields. Perhaps no other natural product, whether of agricultural, horticultural or other origin, has exercised such a vitalizing influence upon the economic life of Canada in recent years. Wheat has been the most powerful factor in attracting population and capital to the Dominion, in bringing virgin areas under cultivation, in widening the market for domestic manufacturing, mining and other industries, in building up the volume and value of export trade, and in creating the purchasing power necessary to finance Canada's heavy imports of textiles, iron and steel, sugar, coal and other essentials which, for various reasons, are drawn wholly or largely from abroad. The success of wheat crops has led to a far-reaching change in the manner in which wheat has impelled the material progress of Canada. When

### Saskatchewan Seed Growers

J. F. Warren, Belbech, Elected President At Annual Meeting  
George Spence, former member for Maple Creek, and first president of the Saskatchewan Registered Seed Growers' Association, retired from the office when the seed growers held their annual meeting at W. J. F. Warren, Belbech, Sask., past vice-president, was elected president. Mr. P. F. Warren, Saskatchewan field crop commission, was re-elected secretary and general manager, and W. J. Manley was elected treasurer.

### Bees Like Sweet Clover

No Nectar Is Wasted From This Valuable Pasture  
There is no doubt regarding the value of sweet clover as a bee pasture. When enclosing a crop of sweet clover at Woodlawn Farm the field was literally covered with millions of honey bees, and they stayed with the bees, showing little or no sign of leaving the clover. The bees seemed to be doing their best to prevent the destruction of so much valuable property.

### Reducing Weight

One of the grave mistakes common to overweight persons is to decide suddenly that their superfluous flesh must be reduced quickly. Reduction in weight should proceed slowly. It is impossible to maintain health on a drastic reducing programme. A careful expert to take off in two months what it has taken years to put on and survive the experience in perfect health.

### Saskatchewan Harvesters

Successful Harvesting of Barley for the 1926 crop will number 20,000, it was announced by G. J. Tomsett, general superintendent of the inter-provincial harvester government employment service.

"A harvester is the sound a man hears when his bill blows off."

## Here and There

Following a recent tour of western Canada, W. L. Smith, former editor of the "Farmer's Star" writes that he will be surprised if the aggregate wheat crop of the Prairie Provinces falls below 400,000,000 bushels. "It will not be surprising if the 500,000,000 mark is nearly reached," states Mr. Smith.

Eleven hundred farms will be needed next year to accommodate the British settlers who will be brought to western Canada, according to Major E. J. Ashton, commissioner of the Soldiers' Settlements Board. So far this year 1,410 families were placed on farms in the prairie provinces by this organization.

Huge to the value of \$400,000 were shipped from the Prince Albert district in 1925. This sum was far in advance of that received the previous year and the increase was due to a considerable extent to the activities of the agricultural society boosting hog production. This year the hog raiser's slogan is one million dollars worth of hogs, and from present indications this mark is more than likely to be attained.

Arrangements for the export of large quantities of British Columbia seed potatoes to California are being made by a potato grower of that state. The British Columbia potatoes are desired in California for seed purposes because they introduce new strength into the southern strain. Experiments were made with Canadian grown seed last year in California and growers were well satisfied with the results.

A flock of 46 sheep, comprising 25 ewes and 21 lambs, has been purchased by an official of the Dominion Government under instruction from the Soviet Government for dispatch to Vladivostok, as soon as arrangements can be made for their shipment. Last year quite a number of prize-winning cattle were shipped from British Columbia to Russia and this new order indicates that previous shipments have been satisfactory.

Many valuable shipments of furs from the great trapping areas of the Hudson Bay Company are arriving through the Dominion Express at Montreal. These shipments, valued at \$200,000, after being collected at the various Hudson Bay posts along Hudson Bay and James Bay, are brought down by canoe to the southern terminus of the T. & O. Railway.

Remarkable expansion of passenger traffic into and out of Montreal has been reported during July and August by the passenger department of the Canadian Pacific Railway. The "El-A-Wing" and the "Alouette" on the Boston run and the "Huron" and "York" to Toronto, four new trains declared placed on these routes early in the year have been running with capacity loads. Eastward to Quebec there is heavy traffic for the Ancient Capital, while trains running north into the Laurentians, it is stated, have never been so filled as it is the case this summer.

A muskallunge, 35 pounds in weight, with a length of 30 inches and a girth of 21 inches, was taken from the French River by the French River Bungeon Camp recently according to information received by the tourist department of the Canadian Pacific Railway. This fine fish was taken by E. A. Paristol of New York with a 50-lb. silk reel line and using Club Minnow bait. To date this is the largest fish caught this year to be entered in the annual French River Bungeon Camp Trophy competition.

Calgary. This city had an exciting moment recently when the Most Honorable the Marquis of Salisbury, leader of the British Conservative party in the House of Lords was made an Indian Chief of the Narcees and given the name of "Hagie Plains." The ceremony was conducted with all solemnity. His Lordship kneeling on a blanket to receive the honor and being at the same time presented with a handsome beaded buckskin vest and gloves.

## Here and There

Vancouver—All passenger records for sailing ships to the Orient from the Pacific Coast up to the middle of August were shattered when Canadian Pacific liner Empress of Russia sailed for Yokohama, August 19, with a passenger list of all classes of 517 in addition to many members of the diplomatic and government services returning after vacations.

Dewan Bahadur Sir T. Vijayaraghavachari arrived recently from London on Canadian Pacific liner Munarra at Montreal, en route to Toronto where he will open the National Exhibition at Toronto. The flight with the lengthy name gets over the difficulty for Canadian lips by stating that it is quite proper to address him as "The Dewan." He must have other Canadian cities on leaving Toronto.

Brief Springs—"The last time I visited Brief was over 30 years ago and the trip this year has been a most wonderful revelation," said Brigadier-General H. S. Brown of Montreal, who stayed at the Brief Springs Hotel on his return from a trip to Alaska. This coincides with the opinion of Marley Roberts, famous English novelist, who after a forty year absence from the West, returned in the last Trail Riders expedition early in August.

Calgary—This city had an exciting moment recently when the Most Honorable the Marquis of Salisbury, leader of the British Conservative party in the House of Lords was made an Indian Chief of the Narcees and given the name of "Hagie Plains." The ceremony was conducted with all solemnity. His Lordship kneeling on a blanket to receive the honor and being at the same time presented with a handsome beaded buckskin vest and gloves.

Beating the train to the crossing is always a risk in favor of the train but when a motorist halts his car and waits until an engine is almost alongside him before he tries to get over, then the risk becomes an absolute certainty—against the motorist. This was the case recently in Toronto where a car was signalled to stop by the watchman at a crossing, obeyed the signal, and then decided he would still try and get over. Fortunately there were no injuries and the only sufferer was the automobile.

Pictures of Gertrude Ederle's swimming of the English Channel were sent aboard Canadian Pacific liner Empress of Scotland at the last minute at Southampton and then passed to a waterplane near Antioch and delivered to airplanes at Rimini, thus beating other motor vehicles according to New York news lines by a full twenty-four hours. This is regarded as one of the greatest achievements of mankind of reaching this continent from Great Britain that has ever been successfully accomplished.

Members of the Empire Parliamentary Association, numerous from nine delegates from the Parliament of the United Kingdom and the Irish Free State arrived in Calgary recently on board Canadian Pacific liner Empress of Scotland. They travelled across the Dominion from Quebec to Vancouver, stopping en route at Montreal, Toronto, Winnipeg and Vancouver, they were met by S.S. Armstrong, assistant, August 25, for the opening of the 1926 Imperial Conference to be held in the grandest hall in Canada.

McLaughlin-Buick now presents a new and finer motor car with an engine vibrationless beyond all previous experience!  
At every point in its whole power range, this engine will remind you of the smoothness and quietness of electrical operation.  
No other car today, regardless of its price, accomplishes the same freedom from vibration and rumble. No other closed car interiors are so divorced from mechanical roar.  
McLaughlin-Buick engineering has achieved the result that all motor car engineers have sought for years. Let us give you a demonstration.

## Where To Seed Fall Rye

By E. S. Hoskins, Dominion Field Husbandry

As summer-fall rye is usually seeded to wheat, it is difficult to decide where fall rye should be seeded. When it is a more valuable crop than wheat, it is advisable to seed it on the best prepared and cleanest land. During the last few years, the yield of rye in the three prairie provinces has been 67 cents per bushel, while wheat has averaged 55 cents per bushel, or 29 per cent higher.

The yield of wheat, moreover, under most conditions, is fully as large as the yield of fall rye. It is obvious, therefore, that fall rye should be grown only where, for some special reason, it is not advisable to seed wheat.

Fall rye is most commonly grown on light, sandy soil which is too poor to produce good crops of wheat. While not producing such high yields under such adverse conditions, fall rye will give fairly satisfactory results, also, on soils of medium fertility, but only under very dry conditions. Fall rye will give some what better results than wheat.

Where the soil is light, sandy, fall rye has been found to prevent this from being effectively on account of the trouble during the winter months when drifting is liable to occur. Fall rye is very little troubled by cutworms. It is not attacked by rust, and on account of ripening early, it is exposed to the autumn frosts.

owing to its early growth in the spring it holds weeds in check fairly satisfactorily, and, because it is more early, becomes mature and sheds its seed before being cut. It is more easily harvested at a different time of the year than is wheat, it enables a better distribution of labor through out the season. It is more easily grown for grain, fall rye is used very extensively for pasture and to a smaller extent, for hay.

Experiments have been conducted on several of the Dominion experimental farms to learn in what places in the rotation, fall rye should be seeded. It usually gives best results, of course, on summer-fall, but so wheat is preferred on this land it is not known on what other land it may be seeded. In some parts of the prairie, fall rye may be seeded on wheat stubble after the wheat grain has been removed. On the experimental farms at Morden, Manitoba, and at Indian Head, Saskatchewan, no large yields have been secured. During the last two years, on dried wheat stubble as on summer-fall stubble. While much has been said, it must not be continued in subsequent years on the dried wheat stubble, nevertheless, considering the economy of this method, it is probably not so regarded as the best way in these districts to seed fall rye. However, some studies have been made on wheat stubble in the West.

At Swift Current, Saskatchewan, this method of seeding was a failure and the only successful method, other than seed fall rye on a broad acreage, was to seed fall rye between the rows of corn or sunflower in the third or fourth year of rotation. Each of these methods have given yields, during the last two years, practically as large as where the fall rye was seeded on summer-fall and, of course, at much less cost. One land which is thought to be more suitable to rye than to wheat, is only partly cultivated in this district, probably to the seeding of fall rye after fall rye, possibly in a three-year rotation of summer-fall, fall rye, and fall rye or in some similar type of rotation. When fall rye was seeded in the spring with a crop of grain feed, with a spring seeded grain crop, or when the crop was four inches high, the seeding of fall rye was not satisfactory. Such seedings appear to be on the order of fall rye and, in some cases, to follow the rye in which they are seeded.

When grown for grain, fall rye should be seeded at the rate of one bushel per acre, some time during the first two weeks of September. If possible, it is advisable to seed the rye when the soil conditions are reasonably moist because if seeded in extremely dry soil, the germination may be poor and the stand may be low. When grown for pasture or for hay, the rye may be planted earlier in the season and the rate of seeding somewhat increased. It is advisable to use seed which has been produced in Western Canada because it is less liable to winterkill. The varieties of fall rye known as "Saskatchewan" and "North Dakota" have given very satisfactory results. "Saskatchewan" has yielded as much per acre as fall rye, and is not as productive as the common spring seeded cereals. Seed which has been kept stored in a dry place for one year is less liable to be affected by ergot of rye than newly threshed seed. Fall rye is probably preferable

## Farmer Must Have Foresight To Be Successful

The farmer must be something more than a healthy man and a worker. He must be a man of foresight and a sound judgment. In the city it is possible to make a fortune in a few days by speculating in the stock market because the employer can do the thinking for his employees. In the rural district it is otherwise. Every landowner expects to find success as much upon his judgment and provision as upon his manual labor. Farming has become more of a science than a trade, and a very extensive science. It is true that governments taking account of the situation have had up many scientific experimental establishments which can undertake research that individuals are unable to undertake. But it still remains true that intelligence to understand the importance of the situation is what follows upon, and enough judgment to fit the service thus rendered them to their own advantage. At present, fall rye, farming operations properly conducted demand a variety of qualities not met with in the common people. Action. Catalogue, Quebec.

## Not A Hymn Of Hate

The Star Spangled Banner Sung By Nation Whose Best Friend Is Britain

The "Star Spangled Banner" was unquestionably put down on paper while its composer was laboring under the excitement induced to the writing of an act of war by Great Britain against the United States. But it is no hymn of hate except in the minds of people with evil imaginations, and the very fact that it is ended with a note and a song freely by a nation whose best friend internationally is Britain, is conclusive evidence that it is not. Besides this, the original inspiration of the song is, in all of its aspects, not so much a remembrance that the whole people has taken on a broad aspect without any vital connection with the event, and the British themselves will probably be equally astonished to learn that anybody in this country harbors a contrary idea.—Detroit Free Press.

## Equipped Cathedral With Lightning Rods

Benjamin Franklin Installed System On St. Paul's 1776

New lightning rods are being installed on St. Paul's Cathedral which Benjamin Franklin originally equipped with lightning conductors. In 1776, he was in England negotiating in connection with the difficulties about the British and the American colonies, and at this time he helped to install the conductors. The original rods on the famous cathedral were iron, and engineers who are now adjusting copper rods have a fragment of the original iron conductor which he devised.

## Something To Think About

Many People Speculate On How They Would Spend A Million

Sometimes the comment of unexpected riches has its pathetic aspect. An aged woman near Cleveland recently fell her lot to half a million dollars, but her first expenditure is to be for medical aid to save her husband's failing sight. What would you do with this million? What would be your first outlay? What is the thing that you would want to have always and to die yours? It isn't a useless speculation to wonder far from St. Detroit News.

## Must Reduce Buffalo Herd

National Herd At Wainwright Increasing Very Rapidly

Despite the fact that 2,000 buffalo are being shipped to the wood lands range in the vicinity of Fort Smith this summer, the growth of the national herd at Wainwright, Alberta, has been so rapid that the government has been forced to seek other means of reducing the herd to proportions that are within the grazing capacity of the park. It has been decided to dispose of an additional 2,000 animals on the hoof, by tender, the understanding being that any animal so purchased will be slaughtered and the meat and hides disposed of by sales on the public market.

Last summer 1,521 buffalo were successfully transported to the northern range in the North West Territories, but this depletion of the herd was offset by the annual increase.

## To Find Out How

British Commission To Investigate U. S. Prosperity

American prosperity intrigues the Briton to the extent that he wants to know how it is done. It is announced that the government is sending an other small commission made up of representatives of employers and workers to the United States in September to study industrial relationships.

## Lacked Necessary Courage

Business Man Envisaged Workmen Not Willing To Change Jobs

A tired business man passed a group of laborers seated along the curb and hurried by against the building in Bagley Avenue describing their non-luculent. As he watched huge sand-victories disappeared, washed down gutters of milk and coffee from thermos bottles, he sighed. "I give a lot for an appetite like this," said a voice from the group. "I have never had sufficient courage to trade jobs last enough to cultivate it."—Detroit News.

## Trail Riders Hold Pow-Wow

Parmington Valley, situated in the Canadian Rockies north of Lake Louise, is not altogether isolated as it is approached by the fact that the Trail Riders held their third annual Pow-Wow there. The valley was invaded by several hundred people all of horseback, and the deep atmosphere surrounding the spot was broken by laughter and song.

## An Aid To Horticulture

Experiments Show Plants Progress Rapidly Under Artificial Light

Experiments in the use of intensive illumination as an aid to horticulture were made recently with 1,000 watt gas-filled lamps equipped with large reflectors. In every case the progress of the plants was remarkable, says a writer.

The plants were placed under the light when buds were just beginning to form. Taffels and Long Illinois when placed under the light for six hours a night, flowered in four days growing about an inch a day.

## Destroying Japanese Shrines

Primitive Forms of Superstitious Worship Are Owing Out

The shrines headed of the home department has ordered the destruction of thousands of small shrines throughout Japan dedicated to the primitive superstitions worship of gods, snakes and other animals.

## Case Of Fifty-Fifty

Men Lose Head During Fire Some As Women

A man is just as likely to lose his head during a fire as a woman, but he doesn't cause as much trouble, according to a Fire Chief J. H. Cullie of Vancouver.

## Barber Is Town Historian

## Feeding Growing Calves

Experiments Tried With Three Different Preparations

Barley has been found not a satisfactory substitute for corn in a calf ration. At Scott, Sask., Dominion experimental station an experiment was tried with three different calf meals to ascertain which was the best for growing calves. Nine calves at near a possible equal in age and weight were divided into three lots.

The first lot received the commercial calf meal known as Royal Purple, the second lot a home meal prepared at the central farm in Ottawa consisting of finely ground oats two parts, corn meal two parts, and ground flax seed one part, and the third lot the same except that the meal was prepared at the Scott station and that the corn was replaced by finely ground barley. The calves were taken from the cows when only a few hours old and were fed whole milk for two weeks, when the gradual substitution of skim milk was commenced. In each case the meal was steeped in boiling water before being added to the milk. The concentrates fed in addition to the milk and calf meal comprised whole oats two parts, bran three parts of calf meal one part. The experiment lasted 61 days.

## Case Of Fifty-Fifty

Men Lose Head During Fire Some As Women

A man is just as likely to lose his head during a fire as a woman, but he doesn't cause as much trouble, according to a Fire Chief J. H. Cullie of Vancouver.

## Barber Is Town Historian

Missouri Shop Keeps Diary of Events Each Day

## Trail Riders Hold Pow-Wow

Parmington Valley, situated in the Canadian Rockies north of Lake Louise, is not altogether isolated as it is approached by the fact that the Trail Riders held their third annual Pow-Wow there. The valley was invaded by several hundred people all of horseback, and the deep atmosphere surrounding the spot was broken by laughter and song.

WORLD HAPPENINGS  
BRIEFLY TOLD

William Edwin Atkinson, A.R.C.A., the distinguished Canadian landscape painter, died recently in Toronto.

Canada's wheat crop for 1929 is estimated at 318,425,000 bushels. Last year it was 411,276,000 bushels.

One thousand and sixty-nine settlers entered Winnipeg recently on these trails. They came from the Old Country and the continent.

Commandant Francis announces that he will undertake his previously planned world flight next year, leaving Spain in April, accompanied by his wife and by Mechanic Rida.

Seven hundred persons died in New York city from poison before last night, said J. W. Quinn, chief chemist of the bureau of internal revenue, in issuing a warning against drinking hot leg whiskeys.

Testimony at the trial of fifty men accused of treason in Angola has revealed that Turkey was forced to join the world war by Enver Pasha, despite the wishes of a majority of the cabinet which stood against this step.

John Henry Meers, whose record for encircling the globe was beaten by Union Mills and Edward S. Evans, will make another attempt to lower the record, according to reports. Meers leaves New York soon on his new attempt.

A statement made public by the department of immigration and colonization shows that there was an increase of 45 per cent in the number of immigrants to Canada during the first five months of the calendar year 1929, compared with the same period a year ago.

Sheila Colin Taylor, wife of the 23rd Mclachlan recently in Winnipeg, and received congratulations from all parts of Canada. "I think I should live to 100," he said. "I am now 90."

Three passengers were killed when the basket dropped from a captive balloon at Kempton, near Bedford, Eng. The accident was caused by a rope which broke leaving the basket. Of the four passengers, only one escaped with his life.

Mr. Hon. John C. McCreary, M.P., one of South Africa's leading statesmen, died Aug. 3 at Cape Town. He was born in Somersetshire, England, in 1841, and went to South Africa in 1880. He was member and treasurer of the South African Government in 1908-10.

States Are United  
Against Russian Red

British Have Completed Ring Formed to China

Following a meeting and the secret services of all the British dominions, just concluded in London, the British cabinet has decided to send officers for assured that with the exception of Turkey and Hindustan the whole southern part of Russia is controlled by a series of states determined to oppose attempts to spread red propaganda.

"These states," it is announced, are united in a confederation, unknown to the world, from Egypt to India and China. It is further announced that Sir Charles Tegart, Victoria police chief, has been appointed to head the propaganda section of Scotland Yard for the next five years.

In Egypt, the governor of Sudan was most friendly with the extremists, just when he was faced with strong opposition to the British. He prepared to withstand red propaganda there. In India, Sudan bin Said has moved into an office from his northern neighbors. He is unwilling to tolerate any interference from the propaganda.

## To Wipe Out Debt

Belgium Surrenders State Railways to Private Owners

Surrendering her state railways to private ownership in an effort to wipe out the national financial deficit, Belgium in peacetime is now, in assuming the lead for sacrifices among the countries of continental Europe, where finances are in a parlous state.

The holders of treasury bonds have been ordered by King Albert in his position as financial administrator to exchange them for preferred stock of the National Railroad Corporation, which has taken over the state railways.

## No Harry

Norman called at Inglewood—He found that the dog had been killed. "No Harry was going home."

Norman: "What's going on down here, he's convulsed?"  
Norman: "What's going on down here, he's convulsed?"

Norman: "What's going on down here, he's convulsed?"

Y. N. C. 1929

## Canadian Show in New York

Canadian Mayors Invited to Visit N.Y. During Canadian Show

Following a meeting of the executive and general committee of the Canadian Exposition, held at the Hotel McAlpin, headquarters in New York, Henry E. Coleman, executive chair-man of the exposition, announced that plans had been made to bring the mayors of virtually every Canadian city to New York on a special train for the exposition opening in January, 1927. Other outstanding cities in position, which will be housed in the Manhattan Opera House beginning Jan. 10, were made known also, following the meeting.

Arthur L. Lee, managing director of the McAlpin, who attended the meeting, stated that several hours of the hotel would be set aside to entertain the Canadian officials, and that a considerable part of the hotel would be given over to guests here in the show.

He will have special decorations, with the Maple Leaf of Canada predominating, and special entertainments have been arranged, one each in honor of every province of the Dominion.

Among the mayors expected to come here are: The Honorable Thomas Foster of Toronto; M. Martin of Montreal, and the chief executives of Quebec, Winnipeg, Vancouver, Ottawa, and other principal cities. It is planned to have their special train met by a delegation of city and state officials, and Mayor Walker will welcome the visitors. A special committee was sent to Canada a week ago, and are now engaged in arranging various details from the Canadian end.

Already the secret committee "Canada" has been north of the Dominion line, and the young woman selected as the fairest in the Dominion will be entertained while in New York by the new "Miss America," who will be selected at the annual contest in Atlantic City.

Every form of Canadian activity will be displayed and will be represented by exhibits at the show.

## Autumn Tournament At Jasper

Golf Week Organized For Sept. 11 to 18 at Canada's Great National Playground

Announcement is made of the list of events to be held during the first annual autumn tournament on the Jasper Park Lodge Golf Links from Sept. 11 to 18 inclusive. Invitations to the tournament are being extended in charge to all golf clubs on the continent and the interest shown in the tournament to date would indicate that it will be a really sensational competition. It is understood that the trophies and prizes will be unique and of such value that the winners will be highly prized by the winners.

In making entries, golfers are requested to give full name, club membership, and address, and to enter as early as possible by post or telegraph at C. E. Weldon, assistant secretary, tournament committee, Jasper Park Lodge, Jasper, Alberta. Other sports available at Jasper during golf week will include tennis, swimming, cycling, hiking, mountain climbing and motorizing, while arrangements can be made for fishing and hunting trips from the lodge to the best fishing and hunting spots in the park.

## Making Yokohama Great

Reconstruction After Great Earthquake Is Being Rapidly Completed

"Yokohama, Japan, will be a new city when the work of reconstruction after the great earthquake is completed," said Mr. Marshall Martin, a resident of that city who was in Canada en route to Montreal, en route to Japan. He will return to Japan this autumn. The work of reconstruction is about one-third completed, and the work of erecting and planning is finished. Wider streets will be built, and modern buildings and facilities will make it one of the most delightful cities in the world.

## To Salvage Camera

Equipment Lost In Lake As Result Of Aerials Experiment

Frank R. Schuchman, of Fort William, Ont., has been engaged by the Dominion forestry service to salvage the camera and other instruments which were lost at the bottom of Kaskabeno Lake as a result of the wreck of the aeroplane X-7, July 22. The instruments were said to be in 24 feet of water.

Mr. Schuchman is taking out his diver's suit and assistants. He has just started to get the camera and other instruments, and will recover the lost gear. It is said that it would take several months to duplicate the lost camera.

Between eight and nine hundred languages and dialects are in use among the natives of Africa.

The Charm of Soft Fabric

New fashions are soft and flattery with flowered materials and flares. The frock presented here is sure to take the eye of the sales and the customer. First, because of its arresting simplicity of line and second, because of the softness of its material. A wide ribbon sash is belted the waistline, where rippling skirt folds slenderly. The bottom neck is belted with a narrow banding of the same plain material as the flaring skirt. No. 1254 is in sizes 16, 18 and 20 years. Size 18 years (36 bust) requires 1 1/2 yards of fine fluted crepe, and 5 yards plain georgette crepe; ribbon for sash, 2 1/2 yards 5/8 inch wide.

The secret of distinctive dress lies in good taste, rather than in ostentatious expenditure of money. Every woman should want to make her own clothes, and the home-dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, maintaining the spirit of the mode of the moment.

Price of the book is ten cents the copy.

## The Training Of Children

Valuable Work Being Carried On For Welfare Of Children in Saskatchewan

Ten or twelve years ago two English ladies specially trained in Sunday School work came to Saskatchewan to see what they could do for the children of the province by giving them instruction in religion. After spending some years in this work, the ladies returned to England. The ladies then conceived the idea of carrying the Sunday School to the children, who were scattered in the prairies and for this purpose a van was built and equipped, and since 1920 this van has been traveling about the southern part of the province, Saskatchewan, gathering children together and teaching them as far as possible, something about the religion of our Lord Jesus Christ. This work was begun in 1920. Now, there are vans doing a similar work in all the prairie provinces and in British Columbia. The children so trained in the summer are enrolled as members of the Sunday School by post and so they are kept in touch with those truths which concern their moral and religious welfare.

But Miss Bosanquet was not content with this; she felt that something should be done to help the children of the sum of \$15,000 to start a girls' welfare fund to give their children a religious as well as a secular education. The school was started in 1915 under the direction of the Department of Education and the work carried on under the name of the Sisters of the Holy Divine, a Canadian branch of the Sisters of the Holy Divine in Canada. The school has grown in numbers and in the quality of its work. It is given by very competent teachers and is well equipped for the work.

In building up our country on a sound religious basis, the children are well cared for, and every provision made for their happiness and well-being. The school is in the beautiful grounds of St. Charles' College and is well equipped for the work.

Well, Alfy, I hear you have taken up walking as the doctor ordered. How does it go?

"Seems a bit awkward at first, without a windmill."

Insurance Agent: Don't you want your office (British) hanging against your wall?

Boss: Yes, all except the clock (Irish) which I want to keep.

## The Canadian Legion

Charter of Incorporation Has Been Granted By Letters Patent

Letters patent incorporating The Canadian Legion of the British Empire Service League have been issued to the veterans of wars, according to an announcement sent out by legion headquarters. Through the charter of incorporation the legion is empowered to receive grants of money and regulate provided, district and local bodies or commands and branches. It is also empowered to receive grants of money and elsewhere, and to establish parallel organizations to be known as legion auxiliaries.

The charter of incorporation gives legal effect to the work of the unification that has been proceeding among veteran veterans organizations since the visit of Field Marshal Earl Haig, grand president of the British Empire Service League, to Canada last year. The original intention of the legion was to seek a royal charter by special act of parliament, but the dissolution of parliament made it necessary to alter this proposal. Application there was made for a charter under the Companies Act.

## To Exhibit At U. S. Fair

Alberta To Be Represented At Big State Fair At Sioux City, Iowa

Alberta is to be represented at one of the big state fairs across the line this year, arrangements being now being made for an extensive exhibit at Sioux City, Iowa, where the states of Iowa, South Dakota and Nebraska will hold their annual livestock show during the week beginning Sept. 19. The exhibit will be prepared at once, and will consist of grain, stock, grasses, both sheep and livestock, coal, tar, sand and illustrative material. It will be shown in the pavilion of the fair, and the fair will be a great success for the province, which has been promised on the fair grounds.

## Condensed Milk Absolutely Pure

Value of Condensed Milk As A Staple of Health

The value of condensed milk as a staple of health was conclusively demonstrated by an issue in the London Daily Mail recently, one sentence to the article reading: "The complete replacement of fresh milk by condensed milk has notably reduced tuberculosis."

The story had to deal with the activities of the London Zoological Society and was reported on the health of the animals. Many animals, especially those with cloven hooves, were liable to tuberculosis, and the tuberculosis of the animals seemed to die of nothing else. Yet they lived under very good conditions and were given every daily draught of fresh milk. The fresh milk was cut off and the dried milk substituted. A mark was made on the milk can, and the animals were kept on the dried milk. The animals seemed to die of nothing else. Yet they lived under very good conditions and were given every daily draught of fresh milk. The fresh milk was cut off and the dried milk substituted. A mark was made on the milk can, and the animals were kept on the dried milk.

## East African Country Has Evil Reputation

The fact that only five names figure upon the map of Lake Edward, in East Africa—Islandia, in the white blank of the unknown, testifies to the remoteness and evil reputation. The name of the country is Ischia. In the past, the natives of Ischia are far-famed as cannibals. The "Ischia" fish is their food to a point. They are all on evil terms with their neighbors. Large tracts of country have been reserved for the natives by the British people from the northwest. Forest game tracks. Off the beaten track, only a compass can find the way. In the last few years the plains on the eastern and southern shores of Lake Edward have been closed and deserted by reason of jungle sickness and the tsetse fly. In the plains are the lions, the leopards, and the tsetse fly. In the plains are the lions, the leopards, and the tsetse fly.

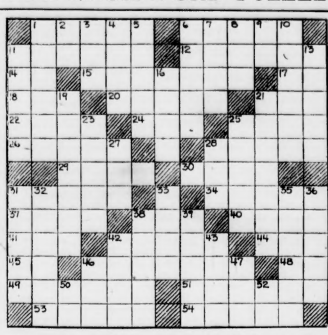

## Memorial Tablet At Zebruge

To the gallant officer, King Albert, who died in 1918, a tablet on the Mole at Zebruge, was unveiled by Prince Albert, according to King Albert of Belgium. Mrs. Gibbs, mother of the commander who lost his life in the raid on the Mole, placed flowers beneath the tablet.

## Linking Empire By Radio

The new long range transmitters connecting London with Canada and South Africa will be put in operation this month, according to the news received by the department of commerce. It is expected that the Australian and Indian circuits will be ready by July.

## Early Navigating At State

Ship Sigs 1888 From London to Victoria, B.C.

As early as 1888, ships were plying directly between Great Britain and British Columbia, according to Captain R. G. Parkhurst, who in an interview with the Vancouver Province, told some of the early history of the Royal Mail Steam Packet Company. In 1888, he said, ships of loading speed "The good ship Spirit of the Age" loaded freight for Victoria, Vancouver Island. Most of the ships in the run round the Horn, but there were instances of cargoes being loaded from London to Victoria via Aspinwall, the Panama railway, the Pacific Mail and the North Pacific Trade Protection Company.

In 1888, he said, ships of loading speed "The good ship Spirit of the Age" loaded freight for Victoria, Vancouver Island. Most of the ships in the run round the Horn, but there were instances of cargoes being loaded from London to Victoria via Aspinwall, the Panama railway, the Pacific Mail and the North Pacific Trade Protection Company.

## To Obtain Long Mileage

Best Times Should Be Placed On Rear of Motor Wheel

To obtain the longest mileage, the best times on a car should be placed on the rear wheels. Some drivers assert that the best time being on the front to minimize the danger from blowouts and the risk of losing control of the car, but this hazard is not so great as the loss of the rear wheels, and the rear wheels usually lie in the driver's field of vision. The spare should replace the front of the rear wheel at the end of several thousand miles of driving. On new cars, all tires must be replaced as originally placed for several thousand miles, then the rear wheels should be put on the rear wheels.

## Value Of Water Power

Rapid Development of Use of Water Power Has Effect on Coal Industry

One of the most important factors which contribute to the present energy situation in the colliery industry, is the rapid development of the use of water power. Little attention has been given to this means of power production, according to a report issued by Bankers Trust Company of New York from its British Information Service, while in 1929 Europe was generating 21,000,000 h.p. by the use of 1923 and today more than 25,000,000 h.p. are being used. This was necessitated by the fact that the world output of coal has remained stationary for the past three or four years at about 1,250,000,000 tons a year, while the demand for heat, light and power has been increasing steadily. Some of the advantages of water power are the fact that it is clean, it is not subject to strikes and labor costs, and it is not subject to strikes and labor costs, and it is not subject to strikes and labor costs.

## Italian Immigrants Arrive

Among total of 575 third-class travellers who were landed at Quebec recently, of the steamship Ascania, was a party of 125 Italian immigrants, the largest single group of this nationality to be landed at Quebec this year. They will be employed on the land in Ontario, the prairie provinces and British Columbia. The remainder of the third-class passengers on the liner consisted largely of Poles, Hungarians and other central Europeans, all on their way to the western provinces.

## "Now," said the master during the reading lesson, "can any of you tell me the meaning of 'divers' diseases?"

"Yes, sir," said Tommy. "Divers' diseases is water on the brain."

Sister: "I'm in love with your daughter, sir."

Her dad: "What are your poor prospects?"

Sister: "Fine! She's accepted me."

Sister: "Fine! She's accepted me."

Sister: "Fine! She's accepted me."

Sister: "Fine! She's accepted me."
